## INTRODUCTION

**V***ocabulary Power Plus Classic* combines classroom-tested vocabulary drills with reading and writing exercises designed to prepare students for the revised Scholastic Assessment Test; however, *Vocabulary Power Plus Classic* is a resource for all students—not just those who are college bound or preparing for the SAT I. This series is intended to increase vocabulary, improve grammar, enhance writing, and boost critical reading skills for students at all levels of learning.

Critical Reading exercises include lengthy passages and detailed questions. We use SAT-style grammar and writing exercises and have placed the vocabulary words in a non-alphabetical sequence.

To reflect the changes to the Writing and Critical Reading portions of the SAT I, Prestwick House includes inferential exercises instead of the analogical reasoning sections. Coupled with words-in-context activities, inferences cultivate comprehensive word discernment by prompting students to create contexts for words instead of simply memorizing definitions.

The writing exercises in *Vocabulary Power Plus Classic* are process-oriented, but they bring students a step closer to SAT success by exposing them to rubrics that simulate those of the SAT essay-writing component. This exposure to an objective scoring process helps students to develop a concrete understanding of writing fundamentals.

We hope that you find the *Vocabulary Power Plus Classic* series to be an effective tool for teaching new words and an exceptional tool for preparing for the SAT.

# Strategies for Completing Activities

## Roots, Prefixes, and Suffixes

A knowledge of roots, prefixes, and suffixes can give readers the ability to view unfamiliar words as mere puzzles that require only a few simple steps to solve. For the person interested in the history of words, this knowledge provides the ability to track word origin and evolution. For those who seek to improve vocabulary, this knowledge creates a sure and lifelong method; however, there are two points to remember:

1. Some words have evolved through usage, so present definitions might differ from what you infer through an examination of the roots and prefixes. The word *abstruse*, for example, contains the prefix *ab* (away) and the root *trudere* (to thrust), and literally means *to thrust away*. Today, *abstruse* is used to describe something that is hard to understand.
2. Certain roots do not apply to all words that use the same form. If you know that the root *vin* means “to conquer,” then you would be correct in concluding that the word *invincible* means “incapable of being conquered”; however, if you tried to apply the same root meaning to *vindicate* or *vindictive*, you would be incorrect. When analyzing unfamiliar words, check for other possible roots if your inferred meaning does not fit the context.

Despite these considerations, a knowledge of roots and prefixes is one of the best ways to build a powerful vocabulary.

## Critical Reading

Reading questions generally fall into several categories.

1. *Identifying the main idea or the author’s purpose.* Generally, the question will ask, “What is this selection about?”

In some passages, the author’s purpose will be easy to identify because the one or two ideas leap from the text; however, other passages might not be so easily analyzed, especially if they include convoluted sentences. Inverted sentences (subject at the end of the sentence) and elliptical sentences (words missing) will also increase the difficulty of the passages, but all these obstacles can be overcome if readers take one sentence at a time and recast it in their own words. Consider the following sentence:

These writers either jot down their thoughts bit by bit, in short, ambiguous, and paradoxical sentences, which apparently mean much more than they say—of this kind of writing Schelling’s treatises on natural philosophy are a splendid instance; or else they hold forth with a deluge of words and the most intolerable diffusiveness, as though no end of fuss were necessary to make the reader understand the deep meaning of their sentences, whereas it is some quite simple if not actually trivial idea, examples of which may be found in plenty in the popular works of Fichte, and the philosophical manuals of a hundred other miserable dunces.

If we edit out some of the words, the main point of this sentence is obvious.

These writers either jot down their thoughts bit by bit, in short,  
sentences, which apparently mean  
much more than they say  
or  
they hold a deluge of words  
as though necessary to make the  
reader understand the deep meaning of their sentences

Some sentences need only a few deletions for clarification, but others require major recasting and additions; they must be read carefully and put into the reader’s own words.

Some in their discourse desire rather commendation of wit, in being able to hold all arguments, than of judgment, in discerning what is true; as if it were a praise to know what might be said, and not what should be thought.

After studying it, a reader might recast the sentence as follows:

In conversation, some people desire praise for their abilities to maintain the conversation rather than their abilities to identify what is true or false, as though it were better to sound good than to know what is truth or fiction.

2. Identifying the stated or implied meaning. *What is the author stating or suggesting?*

The literal meaning of a text does not always correspond with the intended meaning. To understand a passage fully, readers must determine which meaning—if there is more than one—is the intended meaning of the passage. Consider the following sentence:

If his notice was sought, an expression of courtesy and interest gleamed out upon his features; proving that there was light within him and that it was only the outward medium of the intellectual lamp that obstructed the rays in their passage.

Interpreted literally, this Nathaniel Hawthorne metaphor suggests that a light-generating lamp exists inside of the human body. Since this is impossible, the reader must look to the metaphoric meaning of the passage to understand it properly. In the metaphor, Hawthorne refers to the human mind—consciousness—as a lamp that emits light, and other people cannot always see the lamp because the outside “medium”—the human body—sometimes blocks it.

3. Identifying the tone or mood of the selection. *What feeling does the text evoke?*

To answer these types of questions, readers must look closely at individual words and their connotations; for example, the words *stubborn* and *firm* share almost the same definition, but a writer who describes a character as *stubborn* rather than *firm* is probably suggesting something negative about the character.

## Writing

The new SAT allocates only twenty-five minutes to the composition of a well-organized, fully developed essay. Writing a satisfactory essay in this limited time requires facility in quickly determining a thesis, organizing ideas, and producing adequate examples to support the ideas.

An essay written in twenty minutes might not represent the best process writing—an SAT essay might lack the perfection and depth that weeks of proof-reading and editing give to research papers. Process is undoubtedly important, but students must consider the time constraints of the SAT. Completion of the essay is just as important as organization, development, and language use.

The thesis, the organization of ideas, and the support make the framework of a good essay. Before the actual writing begins, writers must create a mental outline by establishing a thesis, or main idea, and one or more specific supporting ideas (the number of ideas will depend on the length and content of the essay). Supporting ideas should not be overcomplicated; they are simply ideas that justify or explain the thesis. The writer must introduce and explain each supporting idea, and the resultant supporting paragraph should answer the *why?* or *who cares?* questions that the thesis evokes.

Once the thesis and supporting ideas are identified, writers must determine the order in which the ideas will appear in the essay. A good introduction usually explains the thesis and briefly introduces the supporting ideas. Explanation of the supporting ideas should follow, with each idea in its own paragraph. The final paragraph, the conclusion, usually restates the thesis or summarizes the main ideas of the essay.

Adhering to the mental outline when the writing begins will help the writer organize and develop the essay. Using the Organization and Development scoring guides to evaluate practice essays will help to reinforce the process skills. The Word Choice and Sentence Formation scoring guides will help to strengthen language skills—the vital counterpart to essay organization and development.

## EXERCISE I—Words in Context

From the list below, supply the words needed to complete the paragraph. Some words will not be used.

litany                      truncate                      lugubrious                      camaraderie  
equanimity                      interminable                      zealous

1. Tony brushed the rain off his jacket as he walked through the glass doors to the school. It was a[n] \_\_\_\_\_ Saturday morning, so Tony was happy that the assessment test wouldn't cause him to forfeit a beautiful spring day. He sat down with his answer booklet, and the test proctor began the standard, twenty-minute \_\_\_\_\_ of instructions, as though the \_\_\_\_\_, four-hour test were not long enough without the elaborate instructions. Tony, not at all nervous after having taken the test three times already, listened to the proctor with \_\_\_\_\_; however, some of the more \_\_\_\_\_ test-takers anxiously tapped their #2 pencils, eager to begin filling in the hundreds of tiny circles on their answer sheets.

From the list below, supply the words needed to complete the paragraph. Some words will not be used.

frangible                      wrenching                      arable                      ubiquitous  
replete                      vernacular                      zealous

2. Abby had taken Spanish in high school, but she had trouble understanding the shopkeeper's \_\_\_\_\_. The little shop was \_\_\_\_\_ with the things that tourists often needed, such as film, medicine, and long-distance phone cards; a shelf in front of the counter contained the keychains, coffee mugs, and tee shirts \_\_\_\_\_ in every souvenir shop. A row of \_\_\_\_\_ vases and pottery on a shelf behind the counter caught Abby's eye, but she had actually come in to ask about the exotic plants growing in the \_\_\_\_\_ plot outside, behind the store.

From the list below, supply the words needed to complete the paragraph. Some words will not be used.

litany            truncate       camaraderie    wrenching  
moratorium    arable        desiccate

3. The sporadic rain caused a[n] \_\_\_\_\_ in the stock car race until workers could \_\_\_\_\_ the concrete track using large blowers pulled by tractors. While the track dried, spectators watched the \_\_\_\_\_ among members of the pit crews as they scrambled to make frantic adjustments to cars in the minutes before drivers could return to the track. Despite the excitement in the air, the whole scene was depressing for Miles, a former driver who had to watch the race from the stands. The eight titanium pins holding his leg bones together never let him forget the \_\_\_\_\_ injury that had \_\_\_\_\_ his once-promising racing career.

### EXERCISE III—Roots, Prefixes, and Suffixes

Study the entries and answer the questions that follow.

The prefix *ortho* means “straight” or “correct.”

The prefix *hetero* means “different.”

The prefix *homo* means “same.”

The roots *dogm* and *dox* mean “belief.”

The root *gen* means “type.”

The suffix *logy* means “word.”

1. Using literal translations as guidance, define the following words without using a dictionary.

A. dogmatic	D. orthodox
B. heterodox	E. doxology
C. homogenous	F. heterogeneous
2. If *para* means “beyond,” then a *paradox* is something that is \_\_\_\_\_.
3. List as many words as you can think of that begin with the prefix *ortho*.
4. What is *homogenized* milk?
5. Give an example of a *dogma*.
6. List as many words as you can think of that contain the root *gen*.
