Prestwick House developed *Vocabulary from Latin and Greek Roots* in response to numerous requests for a solid etymology-based vocabulary program. Because the aim of the program is to increase retention of new words as well as to expand students' vocabulary, we chose to organize the Units by meaning rather than alphabetically. A student who associates a root with an idea will be more likely to correctly assess the definition of that root's English derivative.

Each Unit contains at least three Latin and/or Greek roots; one or more English vocabulary words are provided for each root. Unit Five of this book, for example, includes four roots having to do with driving, pushing, and sending forward. When a student reads through the Unit, he or she will see the key letters that signal the presence of each root in an English word. The letters in the third root of Unit Five form the stems PULS, PEL. Beneath the key letters is the root word from which the English is derived: PELLERE, PULSUM. Students will notice that there are sometimes two forms of the root, and sometimes one. The inclusion of two forms indicates a Latin verb from which English has taken two different forms. PELLERE, for instance, gives us the word *propeller*, meaning “a device with rotating blades move a boat or plane forward,” while PULSUM gives us words like *pulse*, meaning “an even, steady beat” and *impulse*, meaning “a motivation or incentive.” When a root comes from a Latin adjective or noun, only one form will generally be included. Greek roots also appear in only one form.

Beneath the definition of the root, the student will find the word, its pronunciation, part of speech, and English definition. In cases in which an English word has multiple meanings, we have chosen to include only the meaning appropriate to the grade level for which the book is intended. The word *prospect* in this book, then, is a noun meaning “that which is expected,” rather than the more familiar verb meaning “to explore looking for minerals, etc.”; also in this book, *pedestrian* means “lacking excitement; ordinary and dull,” rather than “a traveler on foot.” In some instances, students may find it useful to review meanings that do not appear and discuss how they are related to the meaning presented.

If the word has a prefix, or if it is especially difficult to reconcile with its root, the entry will contain an analysis of the parts of the word, followed by a literal definition. *Repulsion* in Unit Five of this book, is explained as *re*, meaning “back,” + *pulsum*; the literal meaning is “a pushing back.”

Finally, each entry provides a sentence using the word and, when appropriate, introduces pertinent synonyms and/or antonyms. For added visual reinforcement of this understanding, mnemonic cartoons appear in each Unit.

Six different kinds of exercise follow the Unit entries. They include three kinds of practice using words in context, one test of a student's ability to infer information based on a word's meaning, one reading comprehension exercise, and one activity in which a student must deduce the meaning of an unfamiliar word based on knowledge of the word's root. By the end of the exercises in each Unit, students will have had thorough practice using the word in context and will be prepared to make the word part of their working vocabulary.

Note: We have changed the form of some vocabulary words to make the sentences and exercises more interesting, eliminate awkward phrasing, and avoid excessive repetition. For example, a noun (marvel) may be changed to an adjective (*marvelous*) or a verb (*marveled*).

UNIT ONE

PHOT, PHOS
Greek PHOS, PHOTOS, “light”

PHOTOTROPIC (fō tō trō’ pik) adj. tending to grow or move toward light
G. photos + tropein, “to turn” = to turn toward the light
Because they are phototropic, daisies always grow toward the sun.

PHOSPHORESCENT (fos fō res’ ant) adj. giving off light without heat
G. phos + phorein, “to bear” = light-bearing
Harvey stuck phosphorescent stars on his ceiling so that it would resemble the nighttime sky.

PHOTOGENIC (fō to jen’ ĕk) adj. attractive in pictures or photographs
G. photos + genic, “suitable for” = suitable for photographs
Lucy was so photogenic that total strangers often asked to take her picture.

LUC
Latin LUX, LUCIS, “light”

LUCID (löō’ sid) adj. easy to understand; clear
Sophie’s explanation of quantum physics was so lucid that I understood everything.
syn: comprehensible ant: confusing

ELUCIDATE (ē löō’ si dāt) v. to make clear by explaining
L. e, “from” + lucis = to bring light from
The attorney asked the witness to further elucidate the information he had.
syn: clarify ant: confuse

TRANSLUCENT (trāns lōō’ sānt) adj. allowing light to pass through
L. trans, “through” + lucis = light passing through
Through a translucent blue cloth draped over the window, we could see the sun.
syn: semi-transparent
**SPEC, SPECT**
Latin SPECERE, SPECTUM, “to look at”

**CIRCUMSPECT** (sûr’ kûm spekt) adj. careful; mindful of rules and consequences
L. circum, “around” + spectum = looking around
The marchers in the protest rally tried to be circumspect and not break any laws.
syn: prudent ant: reckless

**PROSPECT** (pros’ pekt) n. that which is expected
L. pro, “forward” + spectum = looked forward to
The prospect of a trip to the dentist with my bratty kid brother was hardly thrilling.

**SPECTER** (spek’ tar) n. a ghost or phantom
Hattie seemed to see a specter in every corner of the dark house.

**VID, VIS**
Latin VIDERE, VISUM, “to see, to look”

**INVIDIAUS** (in vid’ ē as) adj. hateful or spiteful
L. in, “against” + videre = to look against
One candidate made an invidious speech against his opponent.
syn: defamatory ant: pleasant

**PROVIDENTIAL** (prä vō den’ shal) adj. happening by good fortune
L. pro, “forward” + videre = to look forward
Through a providential series of events, Nigel found himself manager of the company.
syn: fortunate ant: unlucky

**IMPROVISE** (im’ pro vîz) v. to create without any forethought or preparation
L. in, “not” + pro, “forward” + visum = not seen in advance
When Carl lost the cards with his speech on them, he was forced to improvise.
ant: plan

**PROVIDENCE** is literally the ability to see in advance, so the word is sometimes used as a synonym for “God.”
**PRUDENT** is a related word that means “carefulness.”

Exercise V. Fill in each blank with the word from the Unit that best completes the sentence, using the root we supply as a clue. Then, answer the questions that follow the paragraphs.

For nearly two centuries, a man's appearance had no effect on his candidacy for president of the United States. George Washington, the father of our country, had wooden teeth and rarely smiled. Because of a severe visual disability, James Buchanan tended to lean his head to the side. Abraham Lincoln, although known for his height, did not have the sort of ____________(PHOT) face that would attract interest on television. William Howard Taft was a Supreme Court justice, as well as president, but he also weighed over 325 pounds. Franklin Delano Roosevelt could not walk, but his confinement to a wheelchair remained unknown to the public because he communicated with the nation primarily through radio addresses.

All of this changed with the 1960 presidential election, a tight contest between Vice President Richard Nixon and Senator John F. Kennedy of Massachusetts. The tradition of debate between candidates is a rich one in American history, but never before had one of these debates appeared on television. According to reports of the time, Senator Kennedy appeared much more at ease than his rival did. Kennedy used cosmetics to emphasize his suntan, and his confidence and bright smile clearly impressed the television audience. His ability to ____________(VIS) in the middle of this heated debate made him seem collected and relaxed. Vice President Nixon, on the other hand, did not fare well with his makeup. His pale complexion was not suited to television lights, his need for a shave showed through the makeup, and, as the debate went on, he began to sweat. His forced smile and nervous movements also made him appear defensive and confused.

After the debate, two separate polls were taken, one of radio audiences and the other of television viewers. Both asked the same question: Which candidate do you think won the debate? The results were striking. The radio audience thought that Vice President Nixon had won the debate, while the television viewers thought that Senator Kennedy had won. This difference ____________(LUC) an important point about human nature: What we see, more than any other sense, greatly influences our opinions of other people. Clearly, a visual impression of a leader also affects the choice we make at the polls.
1. 1. Which of the following is a synonym of confinement as it is used in the first paragraph?
   A. preference
   B. restriction
   C. insanity
   D. disability

2. Which of the following best summarizes the main idea of this essay?
   A. Tall presidents tend to seem more presidential than short ones do.
   B. Physical appearance does not accurately indicate presidential performance.
   C. The visual sense seems to dominate the others in creating ideas about a public figure.
   D. The television age has made people more superficial in their judgments.

3. Why did the television audience think that Kennedy had won the debate?
   A. Kennedy had a more confident voice than Nixon did on the radio.
   B. Nixon seemed to dislike speaking on the radio more than on television.
   C. Nixon appeared less confident on television than Kennedy did.
   D. Both Kennedy and Nixon showed excellent debating skills.

Exercise VI. Drawing on your knowledge of roots and words in context, read the following selection and define the italicized words. If you cannot figure out the meaning of the words on your own, look them up in a dictionary.

When she sat on the photographer’s stool, the entire class was silenced. Lucinda was the most photogenic girl in her school; the camera seemed to adore her. In every portrait, her visage was as bright and clear as that of an angel. Everyone who saw the pictures said that her face glowed with enthusiasm and speculated as to why this might be the case.
